

HOW TO: Wirelessly Transmit CCTV Images on a Large Commercial Site

VideoMitter.com
— outperforms others —

Up to 20 pairs of VideoMitters can be used on one installation. Being a totally digital transmission, the images are far superior to analogue transmitted ones. Transmission distances are obviously effected with the material used in the building's construction but the VideoMitters have performed exceptionally well in "difficult" buildings. Additional antennas are available to increase performance in difficult environments.

Please Note

These "Technical Tips" help sheets aim to answer commonly asked questions in a concise and informative manner - they are for advice & guidance only and do not replace any of the manuals or other literature supplied with our products.

VideoMitter Order Code: **MITKIT (Pair Tx & Rx)**
